TECHNICAL EXPERIENCE

Postman, Remote -

Senior Solutions Architect, JUN 2024 - Present

After transitioning back from an extended Parental Leave at Postman and rejoining a customer-facing team, I was responsible for:

- Guided customers in our largest Enterprise segment through their individual SDLCs and tooling with technical consultation and enablement.
- Educated clients on API lifecycle best practices through product solutions that would achieve their development and business goals in complex, highly regulated enterprise infrastructures.
- SME/point person for guiding customers through authentication system configurations, CI/CD implementations, and developer onboarding.
- Driving value and adoption of Postman by enabling customers to collaborate through product capabilities, solving for their unique workflow needs, and integrating with external tooling.
- Teamed with Product Engineers, Sales and Customer Success to identify outreach targets for expansion and product optimization opportunities.

Senior Developer Advocate, AUG 2022 - JAN 2024

After transitioning into the Student Programs team at Postman, I was responsible for:

- Scaling student programs in the AEMEA region by nearly doubling the number of program ambassadors in a single fiscal quarter.
- Creating efficient end-to-end internal processes by using a technical admin tool (ReTool) to create shared dashboards which automated operations like sending external emails and updating data sources.
- Creating views into external issue handling data to help my team meet and improve Service Level Agreements (Zendesk).
- Managing social media presence for Student Programs by hosting livestreams on Youtube, Twitch, and LinkedIn, targeting students and educators with over 15k impressions in the first 6 months of launch.
- Leading in-person and online workshops + sponsoring hackathons, converting over 2k student viewers per quarter into campus product advocates.
- Preparing student ambassadors in the AEMEA region to lead their own product-led workshops. Supporting the initiatives of over 30 students in the AEMEA region in less than 6 months.
- Developing project-based learning courses to promote the company's vision of API literacy through an LMS (SkillJar).
- Producing written internal and external educational content through Confluence and blog articles.
- Engaging with developer communities at in-person events, in online forums, through Zendesk, and on Discord.

Technical Enablement Architect, AUG 2021 - AUG 2022

- *Developing demo environments in our product, using multiple API architectural styles to use during sessions with enterprise customers.*
- *Producing content for our Learning Management System.*
- *Designing & Creating self-serve internal and external product learning content through an educational course.*
- *Implementing technical integrations within demo environments to ensure the latest product features were always ready to demonstrate to customers.*

TrueMotion/CMT, Boston - *Technical Support Engineer*, FEB 2021 - AUG 2021

TrueMotion/CMTelematics is a leading smartphone telematics platform. As a TS Engineer, I was responsible for:

- *Training and onboarding customers onto the company's program management systems.*
- *Producing/Maintaining a customer support knowledge base and educational videos.*
- *Debugging customers' technical issues and documenting the process for internal teams.*
- *Providing escalated technical and triage support, using an incident response protocol.*
- *Sustaining Engineering through ongoing releases of configuration changes to the company code base.*

STEM ENRG, Boston - *Project Manager*, SEP 2020 - APR 2021

STEM ENRG is a non-profit program for women of color. It provides opportunities to build technical projects for local community organizations. I started as a Mentee and was quickly promoted to Project manager, offering technical support, education, and leadership to a team through an Agile workflow.

General Assembly, Boston - *Engineering Fellow*, JUNE 2020 - SEP 2020

At GA's Software Engineering Immersive program, I received a holistic technical foundation essential for full-stack development.

- *Built full-stack applications for teachers and conducted user research for continued iteration.*
- *Incorporated functionality from 3rd-party APIs to add complexity and nuance.*
- *Collaborated on teams to build and demo applications in an Agile workflow.*
- *Problem-solved using industry standard development tools and documentation.*
